Skills

- Web development basics: HTML, CSS, JavaScript,
- Front-end Frameworks: AngularJS, React.js, Redux
- Database tools: APIs, JSON, MongoDB, SQL, PostgreSQL

Experience

Software Engineer Intern, Microsoft (2017-current)

- Five weeks in classroom learning C#, .NET application building, and CS fundamentals taught by senior Microsoft engineers.
- Eleven weeks as part of a Microsoft team developing an internal project.

Web Developer, IUNU (2016-2017)

- Created client facing MVC framework React.js web application using Mongo, Redux, HTML, CSS, and JavaScript
- Created an MVP data aggregation tool over the course of one month in a three-person team
- Built a second iteration of the same tool over two weeks featuring a robust front end, code review and refactoring, incorporated Redux into a new boilerplate, and implemented a Redux feature for the app contributed bug fixes
- Learned Redux, Meteor, and MongoDB through self-study over the course of two weeks
- Researched industry standard image processing tools, cloud storage systems, as well as doing data comparison
- Created product roadmap the software engineering team used throughout the project

Web Development Immersive, General Assembly (2016)

- Website development programming with 480 hours of classroom instruction on web technologies and computer science basics

- 50-70 hours per week of technical website design that produced 4 web apps and learning new technologies, debugging code, and basics of QA
- Proficient in JavaScript, HTML, CSS, the MEAN stack, AngularJS, and algorithm design
- Acted as Project Manager for Sharkfile, a project management and overview suite
- 5Things team won a one day hackathon, incorporating web scraping, a SQL database, focusing mainly on the front end
